SELECTION GUIDE

1

Using our horsepower/acres chart, select the product series appropriate for your needs.

2

Find the sections corresponding to how you would use your YANMAR tractor (mowing, digging, etc.).

3

From your selection of product series and uses, choose the types of attachments you need.

4

Speak with a product expert and/or review the product sheets to help make your final selection.

MOWING

	FINISHING CUT			ROUGH CUT	
	MID MOUNT	PULL BEHIND	TURF BATWINGS	ROTARY CUTTERS	BATWING CUTTERS
SA SERIES	60"	UP TO 60"	-	UP TO 48"	-
YT2	60"	UP TO 60"	-	UP TO 60"	-
YT3	NA	UP TO 84"	12'	UP TO 84"	12'
YM3	NA	UP TO 84"	12'	UP TO 84"	12'

FINISHING CUT

A finishing cut mower is the best choice for areas that have already been cleared, such as golf courses and large landscapes. These mowers have similar blades to a standard lawn mower, and provide a uniform cut for both uneven and flat landscapes.

ROUGH CUT

Rough cut mowers are best for clearing your land of brush, weeds, tall grass, and saplings. They have a heavier, sturdy blade, allowing them to easily cut through denser material.

PLANTING

	ROTARY TILLERS	BED SHAPER	DISC HARROWS	SEEDERS	CULTIPACKERS
SA SERIES	UP TO 60"	33.5"	48"	-	UP TO 48"
YT2	UP TO 72"	33.5"	UP TO 64"	-	UP TO 72"
YT3	UP TO 84"	-	UP TO 96"	UP TO 72"	UP TO 84"
YM3	UP TO 84"	-	UP TO 96"	UP TO 72"	UP TO 84"

TRACTOR TIP: When preparing soil, our bed shaper is the most versatile choice. Till, raise and shape beds, lay mulch, and lay drip tube(s) all in one pass. It can even install two irrigation drip tubes or drip tapes simultaneously.

DIGGING

	BACKHOE	POST HOLE DIGGERS
SA SERIES	6'6" DIG DEPTH	YPH25 YPH35
YT2	7'6" DIG DEPTH	YPH35 YPH65
YT3	8'6" DIG DEPTH	YPH65
YM3	8'6" DIG DEPTH	YPH65

BACKHOE

The backhoe is one of the most versatile attachments a tractor owner can buy. Digging force and dig depth depend on the size chosen, as well as the horsepower and hydraulics of your tractor. The larger and deeper the hole, the more horsepower and hydraulics will be required. *Mechanical thumbs and 9"-24" buckets available.

POST HOLE DIGGERS

Post hole diggers are great for jobs like fencing, planting trees, or building a deck - and work great in most conditions. Augers - or screw-like tools used to bore the holes themselves - are sold separately, allowing you to choose the best option for your needs.

GRADING

	BOX SCRAPERS	GRADING SCRAPERS	LANDSCAPE RAKES	REAR BLADES
SA SERIES	UP TO 60"	UP TO 54"	UP TO 72"	UP TO 72"
YT2	UP TO 72"	UP TO 60"	UP TO 96"	UP TO 96"
YT3	UP TO 72"	UP TO 72"	UP TO 96"	UP TO 96"
YM3	UP TO 72"	UP TO 72"	UP TO 96"	UP TO 96"

TRACTOR TIP: When choosing grading attachments, always be sure that they are as wide or wider than your tractor's tires. This ensures that your tracks are covered, and allows for a smooth finish.

MATERIAL HANDLING

	FRONT LOADERS	PALLET FORK	BALE SPEARS
SA SERIES	UP TO 1200 LB LIFT CAPACITY	-	-
YT2	1300 LB LIFT CAPACITY	YPF2242S	YBS3044S
YT3	UP TO 2500 LB LIFT CAPACITY	YPF4448S	YBS3044S
YM3	UP TO 2500 LB LIFT CAPACITY	YPF4448S	YBS3044S

*Lift capacity is at the pins

TRACTOR TIP: The best practice when driving with a load on the front of your tractor is to position the bucket, spears, or fork as low to the ground as possible for maximum stability and visibility. *Always use proper ballasting per your operating manual.

HARVESTING

	DRUM MOWERS	TEDDER / RAKE	MINI ROUND BALER
SA SERIES	51"	88"	28"x20" BALES
YT2	51"	88"	28"x20" BALES

DRUM MOWERS

Drum mowers easily cut through the thickest of hay with minimal horsepower requirements. These attachments are used for hay cutting, not finish or brush mowing.

TEDDER / RAKE

Tedders fluff up the hay and turn it over to speed up the drying process, preparing for baling. Rakes are used to collect cut hay or straw into windrows.

MINI ROUND BALER

This attachment is proportioned perfectly for tractors under 30 HP and creates easily managed bales in short order. Property owners have more control over their operation and small land owners have the independence to make their own hay.

SNOW REMOVAL

	FRONT LOADER SNOW BLADE	FRONT MOUNT SNOW BLOWERS	FRONT MOUNT BLADES	REAR BLADES	REAR MOUNT SNOW BLOWERS
SA SERIES	72"	60"	72"	UP TO 72"	UP TO 64"
YT2	-	60"	72"	UP TO 72"	UP TO 64"
YT3	-	-	72"	UP TO 95"	UP TO 74"

TRACTOR TIP: When using a front blade for snow removal it is important to practice and work slowly at first. Keep the blade angled, allowing it to create windrows and push snow to the side of the tractor as it travels.

QUICK HITCH

Spend less time changing attachments.

Make quick work of changing from one 3-point hitch attachment to another without even leaving the seat of your tractor. The Quick Hitch is compatible with most YANMAR attachments, including rear blades, box scrapers, landscape rakes, finish mowers, cutters, disc harrows, seeders and tillers.

FEATURES

- For use on tractors with Limited Category 1 & Category 1, 3-point hitch
- Heavy-duty steel construction
- 7/8" mounting pins and adapter bushings
- Fast, easy attachment and release
- Comes standard with a bracket for use with attachments that have a floating top link
