

CLAW GRAPPLE

FEATURES

Lightweight: Assembled at the factory for fast installation and use.

Powerful: Sturdy yet lightweight allowing to lift heavier loads.*

Security: Strategic design and size of cylinders helps reduce the risk of damage to the hydraulics.

Work smarter with a grapple

One of the most useful attachments you can get is a grapple. A grapple allows you to pick up a large variety of materials such as logs, rocks, brush and more with ease.

The TVK-YL110P is for the SA221, and the TVK-YL210P is for the SA324/424.

3rd function valve kit required.
